

# Construction tournament 2024

**Taurian Concordat  
New Vandenburg**

**20.08.3068**

As you step out of the transporter, you overlook a military area located in a basin. Some mechs are crossing a huge square in front of a mech hangar.

A woman in a black costume approaches you and asks you to follow her. After half an hour you enter a test lab with various computer groups and mech simulators. A man in a blue suit is leaning against a centrally positioned holo-vid.

After you have gathered in front of him, he begins to speak:

“Good afternoon ladies and gentlemen I am General Armand. I am pleased to welcome you here and that so many of you have accepted our offer to construct a mech. This facility will be available to you in the coming weeks. The exact criteria for construction can be found in the files. Due to our supply situation, there are no extraordinary weapons available and we do not have that many jump jets. Your mechs must be submitted by Sunday, October 20th of this year at the latest.”

Have fun and good luck.
